FOR IMMEDIATE RELEASE

National Safety Apparel (NSA) releases the TrueComfort™ FR Knit Shirt Collection that meets NFPA 2112 and 70E Standards

Time and time again National Safety Apparel (NSA) has been asked to manufacture a lighter weight knit shirt that would meet the needs of workers exposed to the potential hazards of flash fire and arc flash. It took some time, but they are proud to answer with their newest garment line. The TrueComfort™ FR Knit Shirt Collection is constructed from a 5.5 ounce 100% FR Cotton fabric that meets NFPA 2112 and 70E (HRC2) Standards.

Looking to meet the individual needs of the men and women working in industries that require flame resistant clothing, NSA is proud to offer a variety of styles in their new FR clothing line. Options include a Henley, Polo, Mock Turtleneck, Long Turtleneck, Long Sleeve Tee Shirt and custom options available upon request. Their newest collection is sure to have an option that will meet the needs of employees, while keeping them protected.

Workers can work from dawn to dusk and remain comfortable in this flame resistant collection! National Safety Apparel is offering the TrueComfort™ FR Knit Shirt Collection in four key colors: navy; grey; khaki; and orange.

Innovating the best options in flame resistant work wear to meet the needs of the industries they serve is what National Safety Apparel does best!

About National Safety Apparel:

Headquartered in Cleveland, OH, National Safety Apparel (NSA) is a leading USA manufacturer of protective apparel for the electrical utility, oil, natural gas, steel, glass, construction, manufacturing, and other industries. Using the latest fabrics and technologies, NSA regularly introduces new and innovative products to enhance the safety apparel options available to workers. For over 75 years, workers across the country have relied on NSA's quality craftsmanship and ability to manufacture durable safety products that are built to last!
