

Written Electrical Safety Program Review and Development

e-Hazard can assist in the development of a written electrical safety programs to guide your company to safety. Having a written electrical safety program in place is a key component for the safety of your employees. Our team of experienced professionals has many years of experience in industry creating and implementing Electrical Safety Programs as required by NFPA 70E, OSHA and MSHA.

A complete written electrical safety program serves as an electrical safety "road map". It serves to guide compliance to NFPA and OSHA requirements to evaluate your PPE (Personal Protective Equipment) for identified electrical safety hazards in the workplace. The key to your electrical safety success starts with a comprehensive and complete Electrical Safety Program.

What to expect in your written program review:

We will start by having you send us your existing program (if you do not have a program, we will send you our common template for your review) and our team will evaluate your documents and records. We will then work with your personnel on developing a program compliant with OSHA or MSHA regulations and applicable consensus standards (NFPA 70E, NESC, CSA Z462, etc.). Upon completion, you will receive a current written electrical safety program or a report on your program per your request.

Documents Reviewed Include:

- Written program
- Test records
- Electrical Energized Work Permit (EWP)
- Procedures - Lock Out/Tag Out (LO/TO), Job Safety Analysis (JSA), Job Hazard Analysis (JHA)
- Switching orders for High Voltage (if used)
- Specifications - Equipment, PPE, etc.
- Training records
- Items commonly cited by OSHA/MSHA
- Other documents in your current safety program.
