

Jason Magee

Electrical Safety Consultant

Jason has over 40 years of experience in the electrical industry, particularly in nuclear power generation and electrical maintenance instruction. As a team leader, he was responsible for implementation of safety protocols, repair and maintenance of the plant's electrical, electronic, and instrumentation equipment while collaborating with electrical engineers on system design. Additionally, Jason taught several training courses for employees on electrical maintenance.

Jason has used his expertise to teach a variety of training courses on electrical maintenance and safety for industry employees, including Theory, Maintenance Techniques, and Protection and Control. He continues to teach at the college level.

Career Highlights

e-Hazard **2025-Present**
Electrical Safety Consultant

Durham College **2022-Present**
Instructor/ Electrical and Electronics and Instrumentation

- Teaches courses in Electrical Safety, Electrical Theory, Electronic Fundamentals, Programmable Logic Controllers, and Instrumentation

Ontario Power Generation **1990-2018**
Instructor/Maintenance Training/Engineering Training

- Taught electrical maintenance courses including Theory, Maintenance Techniques, Protection and Control, Codes and Prints, and Motors and Controls

Pickering Nuclear Generating Station **2001-2005**
Team Leader / Control Technician

- Accountable for the repair, maintenance, calibration, and troubleshooting of a wide range of electrical, electronic, and instrumentation equipment, creating reports and collaborating with engineering on system design
- Supervised and trained a team of 10 technicians, managed task delegation, safety procedures, permits, and ensured compliance with health, safety, and corporate policies
- Interpreted collective agreements in resolving grievances
- Developed, updated, and delivered technical maintenance procedures and staff training

Career Experience Timeline

Education & Certifications

Fleming College, Peterborough, Ont.
Electrical Engineering Technology

Ontario Hydro Eastern Nuclear Training Centre

General Motors, Oshawa, Ont.
Electrician Apprenticeship Program

Licenses & Professional Memberships

Master Electricians License, Canada

Interprovincial Construction Maintenance Electricians License, Canada

Interprovincial Industrial Electricians License, Canada
