

Dawn Gammill

Electrical Safety Consult

Dawn’s experience extends across several different fields, excelling in high pressure situations with multiple demands. She is a licensed electrician in Tennessee, where she owns DMG Electric, a residential electrical business. She taught Industrial Electricity at the Tennessee College of Applied Technology, where she also developed an up-to-date, 16-month, Industrial Electricity training program.

Additionally, Dawn spent six years in administration and management in the Air Force, owned a bookkeeping business, and managed a medical practice. She has earned several awards and certifications throughout her varied career.
